### PROFESSIONAL SUMMARY

Senior Backend Developer with 7+ years of experience building scalable ERP, SaaS, and payment-driven systems using PHP and Laravel. Specialized in REST APIs, wallet systems, and secure payment integrations. Experienced in designing high-performance, production-ready backends for real-world applications.

### CORE TECHNICAL SKILLS

Backend: PHP, Laravel (8–12), Livewire, MVC, SOLID, REST APIs

Databases: MySQL, Indexing, Query Optimization, Transactions

Payments: OPay, PayTabs, Paymob, PayPal, Webhooks, Callbacks

Systems: Wallet Systems, ERP, CRM, SaaS, Multi-Tenant Architecture

Frontend (Support): Blade, Bootstrap, JavaScript, React (basic)

Tools: Git, GitHub, Composer, Postman, Docker (basic), Linux, IIS

**Keywords:** Laravel Developer, Senior PHP Developer, Backend Engineer, REST API, MySQL, Payments, ERP, SaaS

### PROFESSIONAL EXPERIENCE

Senior Backend Developer — Freelance / Remote (2018 – Present)

- Built and maintained scalable backend systems for ERP, CRM, and e-commerce platforms using Laravel.
- Designed secure wallet systems and integrated multiple payment gateways with webhook validation.
- Developed REST APIs consumed by web and mobile applications.
- Implemented role-based access control, audit logs, and multilingual dashboards.
- Optimized database performance for high-traffic, real-world applications.

### SELECTED PROJECTS

#### AFZ Manufacturing ERP System

- Built full manufacturing ERP modules including sizes, colors, patterns, and design cards.
- Implemented Livewire-based dashboards with real-time updates.
- Added audit logs, soft deletes, and advanced permissions system.

#### Mecarde – Wallet & Digital Vouchers Platform

- Developed wallet system with credit/debit tracking for users and admins.
- Integrated OPay and external voucher providers via APIs and webhooks.
- Supported bulk orders and automated fulfillment workflows.

#### CRM System (Sales & Leads)

- Implemented CRM with pipeline stages and Kanban board.
- Integrated Facebook and Instagram Lead Ads using webhooks.
- Built round-robin lead assignment and notification system.

#### E-Learning Platforms

- Developed quiz systems, live sessions, progress tracking, and payments.
- Integrated Google Meet and Jitsi workflows.

### EDUCATION
